Hi David,

I'm not sure what their schedule is for talking w/ the Regions, sorry. In OECA, the best person to start with would be Mark Pollins (DD level).

Hope all's well,

Holly

Hi Holly, we are expecting them to reach out to us. Any idea when they might be doing that?

Also, do you have a contact name at OECA who is involved in this? Our Enforcement Division is asking.

Thanks,

David

Subject: Update on GAO investigation

Hi all,

Just wanted to let you know that OGWDW and OECA (and Karen Johnson on the phone) attended the GAO entrance conference yesterday for a new investigation they are conducting on enforcement of Class II well operations. This review builds off the July report on Class II oversight (same requesters). I have attached the original memo with the objectives and the Qs we received. We got through about half the Qs yesterday, mostly on the enforcement side. We may meet with them again next week to go through the UIC Qs on tracking, etc. They are headed to R3 this week to meet with Karen and her staff and will likely get in touch with several more of you, if they have not already.

Let me know if you have any Qs.

Thanks,

Holly
